## Summary

Frontend-focused Computer Engineering student interested in building clean, reliable user interfaces with modern JavaScript and React. Hands-on experience through personal projects involving state management, async data handling, and responsive UI design. Currently applying TypeScript and Next.js to deepen understanding of scalable frontend architectures.

## Education

Gujarat Technological University	Expected 2027
B.E. Computer Engineering — CPI: 8.7/10.00	Ahmedabad, Gujarat
Secondary & Higher Secondary Education	2021   2023
Class 10th: 87.80%   Class 12th (Science): 85.53%	Ahmedabad, Gujarat

## Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript (Basic)
- **Frontend:** React.js (Hooks, Context API), Redux Toolkit, Next.js (Basic)
- **Web & Styling:** HTML5, CSS3, Tailwind CSS, Responsive Design
- **Async & Data:** REST APIs, Async/Await, Error Handling
- **Tooling:** Git, GitHub, Chrome DevTools, Vite, Postman
- **Backend (Basic):** Node.js, Express.js, MongoDB

## Projects

### Transaction Dashboard (Vanilla JavaScript) | [Code](#)

*Core JavaScript, HTML5, CSS3, REST APIs*

- Developed a performance-oriented dashboard using **pure JavaScript** and **DOM APIs**, focusing on efficient UI updates.
- Integrated REST APIs using **Async/Await** to **simulate real-time** financial transaction tracking.
- Implemented dynamic filtering, multi-column sorting, pagination, and **localStorage** persistence.

### FinDash – Finance Dashboard | [Code](#)

*Next.js (App Router), TypeScript, Tailwind CSS*

- Built a personal finance dashboard with multi-step transaction flows and predictable UI states inspired by fintech applications.
- Implemented TypeScript in strict mode to structure components, validate data flow, and reduce runtime UI errors.
- Developed responsive, mobile-first layouts with Tailwind CSS and motion-enhanced interactions for clear user feedback.

### Fast React Pizza – Ordering Web App | [Code](#)

*React, Redux Toolkit, Tailwind CSS, REST APIs*

- Built a modular UI with **Redux Toolkit** for predictable client-side state management during the checkout flow.
- Developed responsive layouts following usability best practices.
- Optimized frontend performance through efficient component rendering and structured API data handling.

### WorldWise – Travel Tracker | [Code](#)

*JavaScript, React, Leaflet API, Context API*

- Integrated Leaflet API with React to build interactive, map-based data visualisations.
- Implemented conditional rendering and **Context API** for clean, scalable state control across the application.
- Handled asynchronous API integration with robust error catching to ensure a seamless, crash-free user experience.

## Achievements & Certifications

- **Smart India Hackathon (2024 & 2025):** Participant – Collaborated in cross-functional teams to build technical solutions.
- **Hack The Spring, GEC Gandhinagar:** Participant – developed functional prototypes in a fast-paced hackathon environment.
- **Full Stack Web Development (Apna College):** Gained practical exposure to full-stack web development through guided projects and exercises.
- **Programming in C (NPTEL):** Built a strong foundation in core programming concepts, memory logic, and algorithmic thinking.
